

RH NEW LOGIC

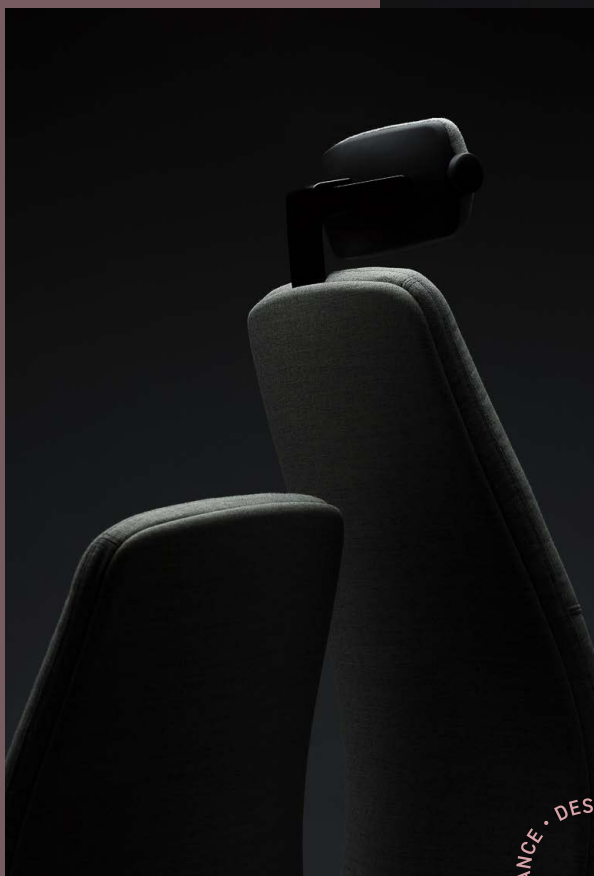

DESIGNED FOR HUMAN PERFORMANCE

A BRAND NEW RH LOGIC

We have created the new RH Logic in order to make something great even better. A chair that merges characteristic comfort and first class ergonomics with improved features and accessibility to enhance user experience.

Furthermore, we have developed a new visual design to create a neat shape and sophisticated look that blends seamlessly into almost any working space.

“To make it
accessible
has been the
driving force”

JONAS STOKKE
Designer RH New Logic

DESIGNED FOR HUMAN PERFORMANCE

WHOEVER YOU ARE, WHATEVER YOU DO, WHENEVER YOU DO IT – DO IT IN COMFORT.

The way we work depends on who we are, what we do and when we do it. But one thing that unites us is the need for well-being during long hours by the desk. The new and improved RH Logic is a natural choice for lasting individual comfort. By adjusting smoothly to your body and providing crucial support and relief, it helps you stay focused on getting things done – no matter who you are, what you do or when you do it.

HOW THE RH NEW LOGIC WORKS

DESIGNED FOR HUMAN PERFORMANCE

THE DESIGN PROCESS

The new RH Logic is the result of a five year long process, where a large team of our own developers have collaborated closely with designers Jonas Stokke and Øystein Austad.

The driving force has been to make the chair accessible and comfortable to use but also to manage and to look at. Partners and architects were involved early on in the process and a number of users have provided crucial input during several stages of testing and development. All this to make sure that the chair meets every demand.

To really make a difference in the long run, we only use sustainable and recyclable materials in every part. The new RH Logic is built to last and to let you get the work done – with more convenience than ever.

A CHAIR BUILT TO LAST

DESIGNED FOR HUMAN PERFORMANCE

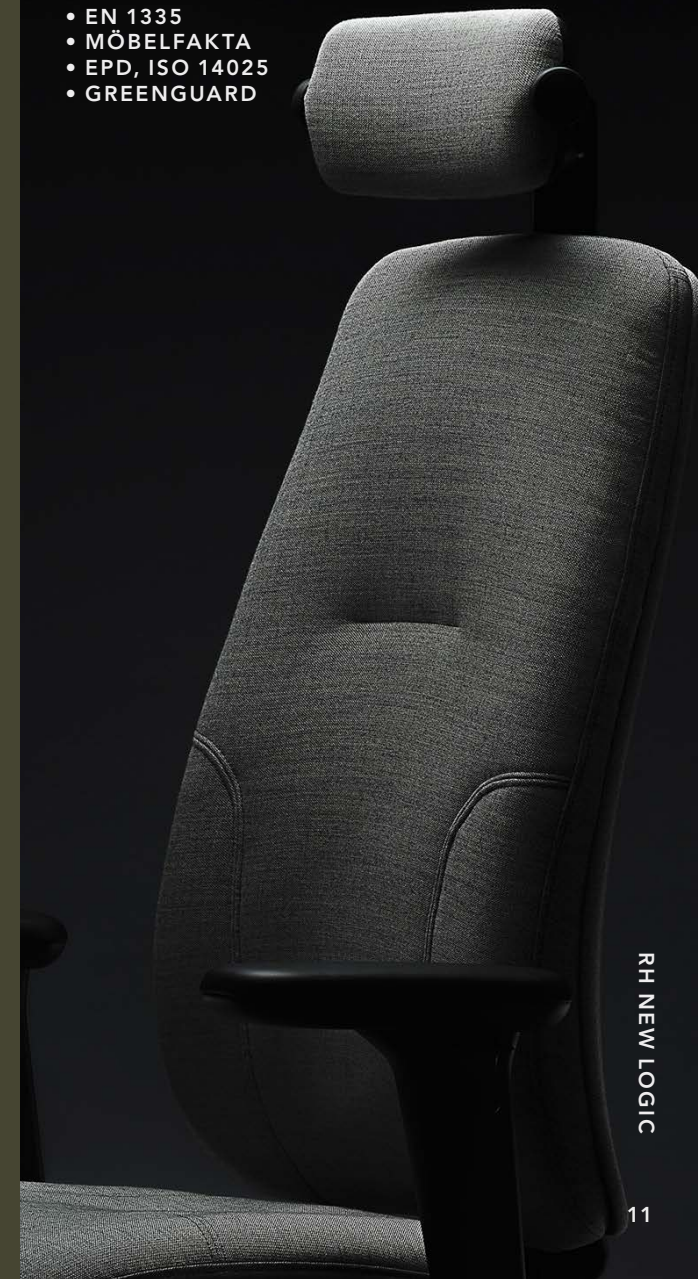

Sustainability and environmental efficiency is a big part of the new RH Logic. The chair is designed to be long lasting and to make the lowest possible environmental impact throughout its life cycle – from raw material extraction to end-of-life. This is why all parts are easy to replace and disassemble, and every component is fully recyclable and free from toxic substance.

"Our products have a very long-life span and some are very technical but we must consider how, when the time comes, these products can be repaired and repurposed. As designers, we have a responsibility to lead the way in creating a circular design culture"

ØYSTEIN AUSTAD
Design Manager, Flokk
