

Ocusshield filter composition

Anti-microbial coating

Anti-glare layer

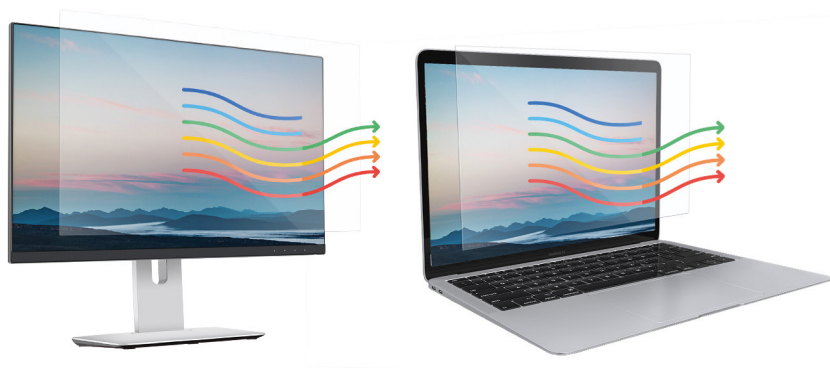

Anti-blue light layer

Optical material

Privacy layer

## Protect your eyes, device and wider health

Now available for all laptops and monitors:

- The world's only medically rated screen protector (MHRA) developed by Optometrists to **filter harmful blue light** which has been shown to cause eye strain, headaches and poor sleep after screen use\*
- With an added anti-microbial coating to limit the spread of bacteria and/or influenza
- Germs can be spread by touching unclean equipment or surfaces (NHS). Screens can harbour particles from coughs and sneezing due to the direct position in front of users
- Ensures true colours with high image clarity resulting in easy viewing with no retro orange tinge
- Made with an embedded privacy filter feature as well as protection for the user's eyes and sleep

Ocusshield is

# 99%

effective against microbes including E.Coli and Staphylococcus\*

SGS labs\*

*"Blue light from digital devices is a hazard to our eye health"*

HARVARD UNIVERSITY

*"Terrible night's sleep? Blame your mobile phone"*
