Managing the risks

Routine action can be taken to minimise the risk:

- ✓ Suitable cleaning regime
- ✓ Surface contamination checks
- ✓ Cable management
- ✓ Bins/waste emptied regularly
- ✓ Suitable storage
- ✓ Regular inspections
- ✓ Individuals taking responsibility
- ✓ Holding handrail on stairs
- ✓ Easy reporting system for defects or concerns
- ✓ Mats in entry areas
- ✓ Suitable umbrella storage
- ✓ Risk assessments for handling of items

Work with your manager on hazards with your job. After an accident someone will often say: I knew that would happen, or that nearly happened to me. We are usually aware of the issues, we just don't get around to doing something about it!

If you see a hazard, take action! If you can't resolve it, make sure the hazard is marked and report it so action can be taken.
