

# HandShoeMouse Wireless

 BAKKER ELKHUIZEN

Work Smart - Feel Good

A relaxed position for fingers and wrist

Fits like a glove!

 BAKKER ELKHUIZEN

A special mouse in our assortment is the HandShoeMouse Wireless. With this mouse there is less lateral wrist-bending and less inward forearm rotation.

There is less muscle activity in the forearm than with a standard mouse. Your hand will lie relaxed on the mouse.

The special mouse keeps the wrist from bending as much to the side while the forearm also turns inward to a lesser degree (Schmid et al., 2015). This means that muscle activity in the forearm is less than it would be when using a conventional mouse (Quemelo & Vieira, 2013).
