

Q-riser 100

flatscreen & CRT monitor stand

 BAKKER ELKHUIZEN

Work Smart - Feel Good

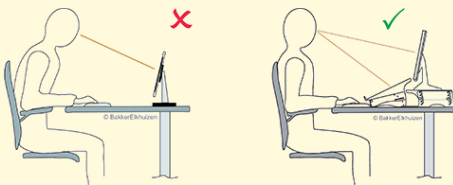

Set your screen to a comfortable working height

The Q-riser 100 positions your low-standing screen(s) at a comfortable working height. This prevents excessive straining of the neck and shoulder muscles and optimises reading comfort.

The Q-riser 100 fits flatscreen and CRT monitors up to 17 inches.

We advise having a screen that can easily be adjusted and tilted so that every user can adjust its height.
